loadDeconvDataFromSummarizedExperiment

Load data to deconvolute from SummarizedExperiment object.

Description

Load data in [DigitalDLorter](#) object to deconvolute from SummarizedExperiment object.

Usage

```
loadDeconvDataFromSummarizedExperiment(object, se.object, name.data = NULL)
```

Arguments

<code>object</code>	DigitalDLorter object with trained.model slot.
<code>se.object</code>	SummarizedExperiment object.
<code>name.data</code>	Name with which the data is stored in DigitalDLorter object.
