<code>prob.matrix</code>	<i>Get and set <code>prob.matrix</code> slot in a <code>ProbMatrixCellTypes</code> object.</i>
--------------------------	--

Description

Get and set `prob.matrix` slot in a `ProbMatrixCellTypes` object.

Usage

```
prob.matrix(object)
```

```
prob.matrix(object) <- value
```

Arguments

<code>object</code>	A <code>ProbMatrixCellTypes</code> object.
---------------------	--

<code>value</code>	<code>matrix</code> object with cell types as columns and samples as rows.
--------------------	--
