---

<code>single.cell.real</code>	<i>Get and set single.cell.real slot in a DigitalDLSorter object.</i>
-------------------------------	-----------------------------------------------------------------------

---

### Description

Get and set `single.cell.real` slot in a `DigitalDLSorter` object.

### Usage

```
single.cell.real(object)
```

```
single.cell.real(object) <- value
```

### Arguments

<code>object</code>	A <code>DigitalDLSorter</code> object.
---------------------	----------------------------------------

<code>value</code>	A <code>SingleCellExperiment</code> object with real single-cell profiles.
--------------------	----------------------------------------------------------------------------

# Index

```
single.cell.real, 1  
single.cell.real<-  
  (single.cell.real), 1
```
