`bulk.sim`

Get and set `bulk.sim` slot in a `DigitalDLSorter` object.

Description

Get and set `bulk.sim` slot in a `DigitalDLSorter` object.

Usage

```
bulk.sim(object, type.data = "both")
```

```
bulk.sim(object, type.data = "both") <- value
```

Arguments

<code>object</code>	A <code>DigitalDLSorter</code> object.
<code>type.data</code>	Element of the list. Can be ‘train’, ‘test’ or ‘both’ (the last by default).
<code>value</code>	A list with two elements, train and test, each one being a <code>SummarizedExperiment</code> object with simulated bulk RNA-Seq samples.
